CLASSIC 100 GEL FLUX

DESCRIPTION:

Classic 100 Gel Flux is an odorless, non-smoking, non-spitting flux designed for stained glass and copper sheet metal assemblies. The flux is supplied in a thickened "gel" to stay where you put it and minimize residues. Classic 100 Gel Flux contains a Zinc Chloride activator that is buffered in the unique formula to eliminate smoking and maintain easy post-soldering removal. This flux cleans off with water and is non-corrosive after washing.

Classic 100 Gel Flux can be used to solder to the following base metals:
COPPER, LEAD, ZINC.

PACKAGING:

Classic 100 Gel Flux is available in 4 oz. and 8 oz. bottles with flip-top dispensing lid as well as 1 gallon pails.
